EDUCATIONAL HISTORY

Asia Technological of Science and Arts – Santa Rosa, Laguna

Bachelor of Science in Information Technology
Graduated May 2025

Capstone Project: LOGIT – Digital Logbook with Issue Tracking System

Best Capstone project in Network Administration
May 2025

- Developed a secure backend with robust authentication, role-based access control (RBAC), and audit trails for accountability.
- Ensured data integrity and user security via input validation and permission levels.
- Technologies used: PHP, MySQL, JavaScript, HTML, CSS, Bootstrap.

WORK EXPERIENCE

Cybersecurity Intern

Exceed Digital Solutions

Feb 10, 2025 – May 19, 2025

- Conducted web application penetration testing and authored detailed security reports.
- Identified and helped remediate critical vulnerabilities including XSS, SQLi, and CSRF.
- Implemented reCAPTCHA v2 and rate limiting to mitigate DoS and brute-force attacks.
- Configured Cloudflare IP whitelisting to secure critical assets such as cPanel and Webmail.
- Installed and managed pfSense firewall to protect internal production network environment.
- Collaborated with a team to enforce security best practices in live environments
